St. Louis Men Get Black Rock Properties: to Work 30 Nen.

Prescott, Ariz, May & For a period of three years George Kialich and Vinent Endrovich, of St. Louis, have exact the Golden State group of fains, in the Black Rock district. This roperty is owned by the Golden State fining company. It has been practically idle for several years but the casers expect to put 25 or 20 men to seek immediately.

Sacked oro is now being shipped rom the Fairview mine, near Crown ling, to the Humboldt smelter. A outract has just been let to extend the unnel 50 feet.

Hitches Engine to trustra

Hitches Engine to trustra

William Blourt, who owns a gold
claim on Lynx creek, has harnessed a
modern gas engine to an old-frashloned
arastra and is obtaining excellent resuits. The engine runs the arastra
much faster than it can be drawn by
a horse and requires practically no
care. If necessary, one man can stope
and bring the ore out of a tunnel to
the arastra while the machine is running skattended. The expense for fuel
averages about 25 cents a day.

The ordinary cost of a Want Ad in The Sil Paso Heraid is 25 posts. It reaches an average of about 196,000 readers each laste.

Ships Four Cars Weekly to El Paso.

Ships Four Gars Weekly to El Passe. Ships Four Gars Weekly to the Iron Chp is shipping four cars residy to the El Passe smolter, the ore hipped averaging 10 percent copperlight grade ore, averaging between 5 and 30 percent copper, is being tored, about 250 tore already being in he stock pile.

In January and February manager Noodward inaugurated a thorough verhabiling and rehabilitation of theorem and its equipment. The collar of the shaft was concreted to a depth of 15 feet, the shaft was retimbered as feet below the concrete, the boilers compressors, hotst and other machings were thoroughly overhauled, and he ming is now in condition to work it full capacity. The alope on the Societ has been extended 15 feet farther vestward from its former length of it feet and good ore has been encountered throughout the entire length of the recent development. The ore concrete of the whole stope is improprise ind the rune's output will be steadily necessed.

Ariroun Commercial Pushes Work. Arirean Commercial Pushes Work.
The Arizona Commercial's aspect improves constantly with its development.
Three stopes in sulphide ore on the 1309 and one on the 1309 levels are being worked and 175 tons of ore are being worked and 175 tons of ore are being worked and 175 tons of ore are being ablipped daily to the Chi Dominion ametics. Drifting along the vein on the 1200 and 1200 levels is in progress and fine sulphide ore if being encountured on each. No drifting is now in progress on the 1409, the cutting of the pump station having finished all work on that level for some time. The A. C. is encountering no trouble from water, despite the unusually heavy rainfall of this year. The pumping plant is litting about 450,000 gallons daily from the 1400 level to the 1500 whence it was to the Old Dominion shaft.
The compecting drift at the 1200 level

Shart.

The connecting drift at the 1200 level between the Old Dominion and Arizona whatts is 5000 feet long. It is used wholly for draining the A. C., and for ventilution.

used wholly for draining into A. L., and for ventilition.

Find High Grade Gold Ore.

Reports from the Mayflower mining district in Greenile county are to the effect that gold ore of high grade leveling encountered there. White, Mc-Allister, Waters and Phillips have six men at work on a property in the Mayflower district ten miles from Duncan churn drilling for copper and ore averaging 1 1-a percent has been encountered. On the northern end of the group at a depth of 26 feet, 15 feet of gold bearing one has been encountered amonging \$50 per ton. In the vein a fall attent or "gonge" yielded assays as high as \$250. The gold of is free ruilling and is described as heins marked to some extent by the presence of finorite and tellurium.

Cale-Goodwin Resumes Wark.

Cole-Goodwin Resumes Wark

fiscure veins in schist and disseminated orea in achief, and the appearance of the formation where cut to considerable depth by erosion indicates a consolidation of all the fissures at depth into one extensive mineralized area.

solidation of all the fissures at depth late one extensive mineralized area.

Prespecting in Buckborn Conyon. In Buckborn canyon, which is reached from the Globe-Roosevelt state highway at a point on the Salt river, 4 1-2 miles below Roosevelt dam, there is considerable promeeting and some submantial, development work in progress at present despite the high water in the Salt river, which must be crossed from the highway to reach the goldfrom the promeeting and the strention of investors, mostly from Minmi The ground owned by Baker & Ferryman is to be developed by an inclined shuft following the largest win on the Pro patria group as soon as some heavy road construction near in pracress is fiffined. Baker proposes to invest at least \$10.800 in this preliminary development.

The ground in Buckhom eanyon and confluent guiches has been worked over an extensive wars in a very superficial manner by early gold miners, nechably Spanlards although a twanti driven in modern times has revealed at large head of from sulphide continuing considerable reinvickment in the form of copper sulphide. This latter ground, also awaed by Baker & Ferryman, will be opened and explored in the near future. Some rety rich surface gold ore from Suckborn canyon seemed fair to start a mild rush of gold sockers from Mismi and rilobe until the containty rising overflow from the Roomevell dam masse the Backborn country in generalize from the Salt river side for the fine heins.

Mexican currency, 17 k. Mexican, penns (El Pano buying price) WOOL PRICES DURING WEEK

Boston, Mass. May 8.—The Commercial Rulletin today mays:

"While there has been only a moderate volume of husiness does in Buston and the offer eathers markets during the week, prices are on a fairly steady level. In the west, however, so make in rommon has been established to any extent between the grower and the dealer.

Wenden, Arix, May 8.—Within a few days a carload of ore frem C. P. Ford's cisims, near Vicksburg, will be shipped to the Humbhild smelter. Other shipments will follow, for there are several hundred tons of 12 percent copper ore ready for stoping. The Pord cisims are being explored by tunneling. The main feature of the property is a 150-foot dike extending through the length of two claims.

Richest Copper in Arizona Increase in Metal Market Is Being Mined Near Grommet Station.

show values of \$5 a to a second a silver! Is in \$100?

A tunnel is in \$70 feet and the breast is \$500 feet below the surface. It is expected that the main vein will be encountered soon. The lodge is irregular and shows croupings in places for a width of \$500 feet. There are 10 claims in the group.

a width of 260 feet There are 16 claims in the group.

Good Read to Miess.

There is a good wagon road from Grommet, on the Arizona & chilfornia milroad almost to the Horn & Kelton group. The road is to be extended right to the mine and then ahipments of one will be made.

Samples of ore taken from the Copper King mile, near the Horn & Kelton property, recently tested at Bartles-ville, carried 18 to 28 percent time and from five to 11 percent copper.

The principal decelopment of the Copper King is a 50 foot shaft, which is all in copper-rine-sulphide one. Sait lake and Nevada parties are now negotiating for the group.

Stake, Bockman & Lewis, who are operating the Engle mine under lease, recently made a shipment of one which resided them 188 a too.

ounces ailver and about five ounces lead.

At present the Magma mill is hand-ling about 150 tons of ore daily, the crude thand sorted running about 25 percent copper and the concentrates accraging the same. Usuarai manager? Browning was able to improve upon the usual method of back filling in the stope by reason of the vertical position of the vein between the 300 and 1000 levels to such an extent that all handling of the ore in the stope after breaking has been obstated. This has been accomplished by laying plank flouring on the floor of the stopes at a steep inclination from each side toward the center of the stone thus forcing the ore when broken to run by gravity into the clust connecting with the drift below.

THE intelligent buyer who wishes to benefit by advantageous prices will find The Herald Adverlising a most efficient aid. It is a guide to the best stores-a market report of the best bargains.

Market Gradually Steadies Open Weak, but the Market After Selling Rush Eases;

Chicago, III. May 1.—Runhes hear today resulted in sharp opening quotaffors were it at senting the market gradually steadied. Glessing prices were unsettled at a le lawer than Friday wight

HAVE BEEN FAIRLY STEADY

Causes New Mexico District to Boom Again.

Sliver City, N. M., May S.—Copper is again king in this district. The increase in the price of the red metal has made things hum in the copper camps in this district.

Hurley, Santa Bits and the other copper properties are working larger forces than ever and the price of copper stocks are going out of sight on account of the increase which is expected to go to 18 cents because of the European demand for the metal. Chino stock has taken a big jump and a sepected to go higher.

Work is being nushed by the Phelipsboden company on the Tyrode camp, as the demand for copper has made it necessary for this company to open up all available properties.

Lerdshurg Becusing.

all available properties.

Camps mear Lordsburg Recenting.

Camps mear Lordsburg are also being effected by the increase in the copper market and the general upward trend of the utseral market. In the south camp in the Promite district work has been guarted on the Hobert E Loe. This is one of the bir producers in the district and has produced more than \$100,000 in silver-copper ore in the past.

The Nellie Bly mine is also under lease and will be developed by Mal. Randal and his associates soon. The Last Chance and the Venus mines have a good trade of ore and will soon be reopened, having produced extensively when operated in the past. The Silver Cell Mining & Smelling company has been Incorporated and will develop its properties in the Finos Altos district. The capital stock is 200,000 and work is to be started at once on the operations.

Activities in the Pinos Altos district are more extensive now than they have ever been in the plant, A. R. Jameson, manager of the B. V. N. company, declare. Three shafts are being sunit by this company in that district.

WICKENBURG MEN TAKE

OVER 11 CLAIMS FOR \$25,000 Wickenburg, Aria, May 8.—John Dobler's promising group of 11 claims. In the Black Rock district, has been taken over under option by N. P. Kayler, W. T. Linville, J. D. Kent, H. Euglow, H. W. Marrill and C. W. Holden, all of Wickenburg. The price is \$25,000, A first payment of \$1,000 is to be made october 1, and the final payment of \$15,000 is to be made october 1, and the final payment of \$15,000 is to be made detailed and in the receipts are to be turned over to Dobler. Development work is to be started at once.

Quickly Recovers and Net Gain Is Recorded

Demand Continues Heavy. New York advices say the copper Demand Conflaures Heavy.

New York delices may the copper market a mechanical and horse emerges continue of quote 13 cents for discirrelytic copper. The activity of the heave mile is the beak-circ of the murbht. Prim all reports Commercificat heave concerns are working digital and day and are pressing copper producers or deliver. Coming Prices.
